

HIPAA RESOURCES

On June 13, 2002, The Domestic Violence Offender Management Board participated in a training on HIPAA (Health Insurance Portability and Accountability Act). The training was provided by the Department of Human Services. Because HIPAA requirements and compliance are specific to each individual agency, the recommendation from the training is that each agency or provider needs to evaluate whether or not HIPAA applies to their program and services.

The following is URL that CMS published that may help in making a decision as to whether you need to comply:
