

This list is only designed to be a resource. The DVOMB has no statutory authority to approve trainers or pre-approve classes.

The following agencies have informed our office that they design trainings that they believe will assist applicants in meeting the requirements of the *Standards*. There may be other training opportunities not listed here.

We do advise that applicants carefully review the *Standards* and provider requirements. We also suggest that applicants request a course description, syllabus and training certificate to assist them in demonstrating how a particular class meets the requirement.

The following list is not all-inclusive and may change as more information is presented to our office.
